DADAIC INVESTMENT COMMITTEE EXECUTIVE MEMO

Target Asset: PLTR | Palantir Technologies Inc. (NYSE)

MEETING DATE: OCTOBER 9, 2026

OFFICIAL COMMITTEE VERDICT

APPROVED: CONDITIONAL SIZE CAP (MAX 4.5%)

Hold Existing 153 Shares ($31,483 USD) • No Chasing at ATH • Accumulate on Dip (<$165.00)

CURRENT WEIGHT
1.86%
Target Cap: 3.5% - 4.5%

CURRENT MARKET PRICE	CONSERVATIVE INTRINSIC VALUE	12-MONTH BASE TARGET	FORWARD P/E & GROWTH
$205.77	**$155.00**	**$245.00**	**95.0x**
Market Cap: $485 Billion	+32.7% Valuation Premium	+19.1% Expected Upside	PEG: 1.16 | Guided Rev: +82%

MULTI-YEAR EMPIRICAL VALIDATION SCORECARD

Mandatory Multi-Year Audited Reality Check (BM사장님 30-Year Veteran Protocol)

AUDITED SEC EDGAR DATA

Metric Category	Multi-Year Audited Fact (USD)	Benchmark / Sector Context	Institutional Verdict
1-Year Total Return	**+115.8%** ($95.35 ➔ $205.77 USD)	S&P 500: +24.5% / Tech Software IGV: +38.2%	Hyper-Alpha Expansion
3-Year Return & CAGR	**+1,148.5%** (CAGR: **+131.5%** from $16.48)	Top 1% of US large-cap equities (AIP Flywheel)	Generational Winner
5-Year Return & CAGR	**+794.2%** (CAGR: **+49.2%** from $23.01)	Completely absorbed 2022 Fed rate hiking cycle	Cycle-Tested Moat
Revenue Scale & Guidance	2023: **$2.23B** ➔ 2025: **$4.48B** ➔ 2026E: **$8.15B**	Q2 2026 Revenue: $1.935B (+93% YoY)	Hyper-Growth Velocity
US Commercial Acceleration	Q2 US Commercial: **+149% YoY** | NDR: **138%**	AIP Bootcamps converting Fortune 500 in 72 hours	Enterprise Standard
Free Cash Flow & Margins	Gross Margin: **85.0%** | Q2 Adj FCF: **$1.22B** (63% Margin)	Highest cash generation in enterprise SaaS	Elite Unit Economics
Balance Sheet Solvency	Cash/ST Treasuries: **$9.20B USD** | Debt: **$0.00**	Zero debt, net interest income surplus	Fortress Safe Haven
SBC Share Dilution Control	Q2 SBC: **$265.2M USD** (13.7% of Rev, down from 32%)	Diluted share count growth contained at <2.2%	Dilution Risk Cleared

MASTER EVALUATION MATRIX: THE 5 MASTERS & TECHNICIAN

Synthesizing Value, Inversion, Fast Growth, Asymmetry, Breakout Momentum, and Chart Setups

6-EVALUATOR ARBITRATION

Warren Buffett: Toll Bridge

Overheated

Core Moat: Palantir's Ontology is the ultimate enterprise toll bridge. Ripping it out would paralyze operations. $9.20B net cash and zero debt represent pristine balance sheet defense.

Red Flag: Trailing P/E of 155x and 50x sales offer zero margin of safety. A magnificent business at an extreme price. Wait for multiple compression.

Charlie Munger: Lollapalooza

Inversion Cleared

Lollapalooza Moat: Military IL6 security monopoly + digital twin ontology + AIP bootcamp speed + enterprise network effects combine to create extreme competitive advantages.

Inversion Cleared: Big Tech cannot replicate Palantir's forward-deployed field culture; NATO sovereign defense budgets surged +85% in Europe.

Peter Lynch: Fast Grower

PEG 1.16

Growth Engine: The quintessential Fast Grower compounding at 82-93% with 63% FCF margins. AIP bootcamps compress 9-month sales cycles into 72 hours.

PEG Assessment: Forward P/E 95.0x / 82% growth yields a PEG of 1.16. Reasonable premium for a category monopolist, but susceptible to growth deceleration.

Stanley Druckenmiller: Alpha

3.2 : 1 Asymmetry

18-Month Inflection: The world is rearming; governments cannot rely on consumer AI toys. Palantir is the de facto sovereign AI operating system. Commercial +149% proves S-curve acceleration.

Macro Watch: Overcrowded hedge fund positioning (70% institutional ownership) makes it vulnerable to macro rate shock selloffs.

William J. O'Neil: CAN SLIM

Extended Base

CAN SLIM Leader: C (+105% EPS), A (+131% 3-Yr CAGR), N (AIP new highs), S (2.7% low short float), L (RS rating 98), I (4,100 institutions). Elite market leader.

Base Retest Needed: Stock is 38% extended past $148 base pivot; 14-day RSI at 75.6 signals short-term exhaustion. Wait for 50-DMA ($193.50) support.

Market Technician: Chart Setup

1 : 2.6 Risk / Reward

Trend & Volume Profile: Perfect moving average alignment: Price ($205.77) > 50-DMA ($193.50) > 200-DMA ($182.80). Testing ATH resistance near $207.50.

Trade Execution: Support: **$193.00 - $194.50** | Demand Floor: **$182.00 - $183.00** | Targets: **$230 / $265** | Stop Floor: **$178.00 USD**.

ADVERSARIAL CRO BLIND AUDIT: 3 MANDATORY FATAL FLAWS

Independent Tail-Risk Guardian & Capital Preservation Directives

BINDING CRO DIRECTIVE

1. Valuation Compression Risk

Audited Vulnerability: Trading at 50x forward sales and 95x forward earnings leaves zero margin of safety. If revenue growth normalizes to 45%, a re-rating to 40x P/E triggers a **-45% to -55% drawdown** ($110 - $125 USD).

Mitigation: Forbid market order chasing at all-time highs; buy only on technical pullbacks.

2. Portfolio Factor Overlap

Factor Correlation Audit: BM사장님 already holds >68% in AI and semiconductors (NVDA, GOOG, AMZN, AVGO, AMD). PLTR carries a high beta of 1.85. Aggressive buying worsens False Diversification.

Binding Cap: Enforce a mechanical **4.5% ceiling** (~370 shares max / $76,000 USD).

3. Executive & Political Key-Man Risk

Governance Scrutiny: High operational reliance on CEO Alex Karp. Unconventional political stances, while advantageous in US defense circles, generate friction in European commercial enterprise contracts.

Mitigation: Continuous monitoring of continental European commercial adoption metrics.

CRO Macro Stress Simulation for BM사장님's Portfolio:

- **Tech Multiple Compression Shock (10Y Yield 5.75%)**: PLTR -38% ➔ Portfolio MDD impact limited to **-0.71%**.
- **Commercial AI Digestion Pause**: PLTR -28.5% ➔ Portfolio MDD impact **-0.53%**. Triggers Buy Tranche at $155 - $165 USD.
- **Geopolitical Defense Surge Shock**: PLTR +28% ➔ Portfolio Alpha expansion **+0.52%**.

12-MONTH VALUATION SCENARIOS & PRICE TARGETS

Probability-Weighted Expected Value Architecture & Margin of Safety Zones

PROBABILITY WEIGHTED

Scenario	Probability	Multiple Applied (FY2027E)	Price Target (USD)	Implied Return	Core Fundamental Drivers
Bull Case	30%	110.0x Forward P/E (EPS $2.85)	**$313.50**	+52.4%	Enterprise agentic ecosystem monopoly; NATO defense deals surge +70% YoY.
Base Case	50%	85.0x Forward P/E (EPS $2.88)	**$244.80**	+19.0%	US commercial revenue sustains +60% growth; adjusted FCF margins maintain ~60%.
Bear Case	20%	48.0x Forward P/E (EPS $2.60)	**$124.80**	-39.3%	Enterprise AI pilot digestion; macro rate shock forces high-growth multiple compression.

Probability-Weighted Target: $241.41 USD

Blended 12-month expected return of **+17.3%**. Skew remains asymmetric in favor of long-term holders, but upside is constrained by initial entry multiples.

Safe Accumulation Zone: $148 - $165 USD

Presents a genuine **20% margin of safety** against intrinsic value ($155 USD). If broader markets pull back, deploy queued accumulation limit orders.

ACTIONABLE PORTFOLIO BLUEPRINT FOR BM사장님

Target Allocation, Tranche Staging, Rebalancing Matrix, and Strict Invalidation Trigger

EXECUTION PROTOCOL

1. Existing Holding Directive

Maintain Full 153 Shares (~$31,483 USD / 1.86% weight). Do not sell or trim. Let this elite sovereign compounder run with AIP tailwinds.

2. Phased Accumulation Tranches

Tranche 1: 50 Shares at 50-DMA ($185-$193 USD).
Tranche 2: 100 Shares at Margin of Safety ($155-$165 USD).
Total target: 303 Shares (2.95% weight).

3. Capital Discipline & Stop-Loss

Zero Market Orders at $205.77. Mechanical ceiling capped at 4.5% ($76,000 USD). Hard disaster stop-loss floor at **$142.00 USD**.

⚠️ **Strict Non-Negotiable Sell Trigger (Thesis Invalidation)**

Downgrade to **IMMEDIATE 50% TRIM / EXIT** if: *"Palantir's U.S. Commercial revenue growth decelerates below 35% YoY for two consecutive quarters; OR if non-GAAP operating margin contracts below 40% driven by resurgent SBC; OR if major hyperscalers successfully deploy open-architecture enterprise ontologies that cause Net Dollar Retention (NDR) to fall below 110%."*
